## We Are FriendsWithYou

*Post Pop Visuals!*

45 EUR

FriendsWithYou is a contemporary fine art collective that has been spreading their unifying message of Magic, Luck, and Friendship worldwide since their founding in 2002. Using ideas like animism, healing arts, the modern ritual and celebrated symbols, FriendsWithYou addresses the human need to relate to one another. Together, the artists have constructed their own brand of post pop visual language a la Murakami, Arturo Herrera and Yayoi Kusama and have instilled in their work the powerful ability to trigger thoughts of happiness, curiosity, and meaningful interaction.

With contributions by Pharrell Williams, Alejandro Jodorowsky, and Peter Doroshenko, this book reveals never-before-seen insight into the complete body of work from the art duo responsible for spreading the self-proclaimed “happy-virus.”
